### **Storm Hits Carroll County REMC Territory**

(Delphi, IN) Approximately 2,300 Carroll County REMC members were without power during the morning hours due to a storm that went through with lightning and high winds. Due to a broken transmission pole owned by Duke Energy on State Road 29 we have 750 members out until that can be repaired.

Virtually all of the outages are south of Delphi in the south and east part of the service territory.

Crews have been dispatched and working since the first outage was reported early this morning. Carroll County REMC officials are hopeful that everyone will be back on service sometime before noon today.

Carroll County REMC is a member-owned electric utility providing electricity to 7,300 customers in parts of 6 counties in northern Indiana. Carroll County REMC's headquarters is located in Delphi, IN.
