

Pole Inspections coming soon:

We are going to be testing utility poles in the Royal Center, Burnettsville, Georgetown and Idaville areas from June 1st till August 1st of 2009. So, please try to give our pole inspectors proper space when driving down the roads they are working. It is hard to tell when a pole is rotten by just looking at it so we send pole inspectors out in the field to help us with this important task. This is a preventive measure to help lessen the frequency of power outages.

Thank you for your patience during the inspection season!
